

#	Setting location	Comment and Questions
1	Every system section , top right side	Every section of the software Error, failed notification messages that pop up at top right side should be change by exact correct message pop up i.e already exit , already submitted , deleting error , editing error , error failed to save document , failed not found , 500 error , 400 error , etc
2	At setting , At opening , any where	Letter formatting : at some place first letter was encoded with capital but system saved as small
3	At opening , before submitting and assign to assessor	Bill No already exit , invoice No exit , bank permit exit , etc is required and important things to overcome duplicate registrations
4	Any section of the system	deleting , editing access should be enable for authorized persons or employees to remove wrongly encoded, duplicate file or information , etc
5	Assessor page	Please put regulatory body / single window setting separately at assessor page without transit flow , risk type , loaded date , depart date , arrived date, released date
6	At opening	Registration date , due date at opening should be save automatically is good but , when an opener want to register by yesterday date or before dates how it works ?
7	At opening	Invoice No is asking again when we go to for submit any operation
8	At opening (shipment detail)	At bulk case: under Weight (Ton) there is quantity is required with red color I think it should be named by weight amount is required
9	At assessor page	After second duty encoded there is insert space for declaration number so this name should be named by Removal No , Receipt No.
10	At VDD	Place of VDD should be change assessor page after custom office/section setting
12	At Duty management	reverse operation to draft IM1070, IM1031, IM1148, IM1149, IM1150, IM1037 duty amount and container guarantee amount wrongly encoded
13	At assessor page	Assessor once they finished all filling process it should hide from the list of assessor page , that help them to know what lists are remain to do, regarding this best example is available on VDD setting,
14	At assessor page	Please remove Document dispatch and transit flow from assessor page and instead of that put regulatory body (Single Window) setting after splitting from transit flow
15	At Assign External agent (Djibouti)	Air documents no need to assign Agent for it , so it should be inactive when Air Document register I.e IM1066, IM1070, for your information for Multi Modal Document we assign ESL as Djibouti Agent
16	At assessor page	Please put manage remark setting at assessor page lastly after vdd setting
17	At assign assessor	The No of operation and No of Item table is good but when we click on the no of operation of an assessor it should be drop down to know which and which operation assigned to the assessor to know detail

18	At assign assessor	Date or due date setting separately need when first duty encoded , when container guarantee amount encoded , when declaration no is encoded , when second duty encoded , when removal number encoded ,
19	At Under Operation Process under transit flow	We need Final Declaration Distribution date insert page from custom
20	At VDD	Please add remark Tab for document not asking VDD, The assessors can remark if the document no need VDD
